Abstract (en)
[origin: EP0562289A2] The invention relates to a roller mill with a rotatably driven milling plate which has a horizontal milling path, with at least one pair of milling rollers and at least one roller carrier whose ends are guided via guide shoulders in housing guides and are coupled to traction rods. In order to achieve particularly quiet running of the milling rollers on the milling path, at least the housing guides and the guide shoulders, guided therein, of the external roller carrier ends are located approximately at the level of the horizontal plane of the milling path. <IMAGE>
