Abstract (en)
[origin: WO9211232A1] There are provided chelating agents of formula (I) (wherein n is 0 or 1 and at least one R<1> group comprises a group NR<11>R<14> where one of R<11> and R<14> comprises a cyclic lipophilic group) and metal chelates and salts thereof. The chelates with paramagnetic or heavy metal ions are particularly suited for use as hepatobiliary contrast agents.

Abstract (fr)
L'invention concerne des chélateurs de formule (I) dans laquelle n vaut 0 ou 1 et au moins un groupe R1 comprend un groupe NR11R14 dans lequel R11 ou R14 comprend un groupe lipophile cyclique. L'invention concerne également des chélates métalliques et des sels desdits chélateurs. Les chélates possédant des ions métal de lourd ou paramagnétiques sont particulièrement utiles comme agents de contraste hépatobiliaires.
