Abstract (en)

Multifunctional module for medical services, specially devised to be installed in zones or areas dedicated to medical care and/or treatment, featuring a chamber (1), which is an inverted isosceles trapezoid set up horizontally and composed of four longitudinal profiles (3, 4, 5) and two closing end lids (2), which comprise the chamber (1), and two exterior rigidity profiles (9), showing the intermediate upper and lower profiles (15, 16, and 17, 18) so as to provide lighting, direct and indirect, the chamber (1) is divided by two walls (12) into three sections, each of which is devised for receiving through columns (19, 20) the different services necessary such as gas supply, control devices, electric power, etc. <IMAGE>
