Abstract (en)
[origin: EP0564022A1] A lighting fixture comprising a box-shaped housing (1). The housing (1) has a rectangular bottom plate (2) and four side plates defining a rectangular lighting aperture (6). An elongated light source (7) is provided parallel to and between the bottom plate (2) and the lighting aperture (6). A means (20) hiding the light source from view is provided parallel to and between the elongated light source (7) and the lighting aperture (6). This means (20) may be supported on two longitudinal lamellae (18,19) placed above the lighting aperture (6) and may be an opal plate or a lens having a hexagonal series of semi-spherical refractory elements. An auxiliary means, such as a flush-mounted halogen lamp or a loudspeaker may be provided in the means (20) hiding the light source from view or in a similar additional auxiliary plate. The means (20) hiding the light source from view may furthermore be partially diffused or be reflecting at its bottom side. <IMAGE>
