Abstract (en)

[origin: EP0564326A1] The invention relates to an assembly for fixing structural elements of a dismantlable enclosure to the ground. The fixing assembly comprises an anchoring base (54) formed by a horizontal plate (60) fixed to the ground and two vertical flanges (62) and (64). The lower end (12a) of the post (12) is engaged between the flanges (62, 64). A return component (58) in the form of an angle bracket includes a stud (86). A pin (72) passes through the flanges (62, 64), the lower end of the post (12a) and the orifice (88) in the horizontal bar (52). The other horizontal bar (50) is engaged around the stud (86). <IMAGE>
