Abstract (en)  
[origin: EP0564360A1] The present invention relates to a offset printing machine. This machine is characterised in that the front (14) and rear (15) bearings of the blanket cylinder (5) are mounted movably in the direction of the bearings of the plate cylinder (4) in respective oblong orifices (16, 17) formed in the front (7) and rear (8) flanges, and in that these bearings (14, 15) are held in the wedged position by means of at least one element of the movable assembly of the impression cylinder (11), in the printing position, and are laid against adjustable stops (34) carried by the flanges (7, 8), these adjustable stops (34) determining the centre distance between the plate (4) and blanket cylinder (5). <IMAGE>
