Abstract (en)
A heating body to be used as a towel heater/drier and/or as a heating and decorating radiator comprising modular manifold segments (13, 15) aligned and fixed to one another by means of threaded fittings, and pipes fixed between each couple of manifold segments. The manifold segments (13, 15) are made in die-cast aluminium alloy, whereas the pipes or columns (12) are in extruded aluminium alloy, said pipes or columns (12) being fixed to the manifold segments (13, 15) before the in-line connection thereof, so as to form the composite heating body. <IMAGE>
