Abstract (en)
[origin: EP0564822A1] A tubular bag, in particular for pourable bulk products, such as peas, beans, nuts, screws or the like, consisting of a film-like material which is sealable at least on one side, having a longitudinal seam (4, 5) and two transverse seams (9, 10), the longitudinal seam (4, 5) being constructed as a fin seam and being formed on the outside and fixed by spot-type or similar sealing, and the sealing surface of the longitudinal seam being provided with a cutout (6) coming from the inside of the bag, and a separation or perforation line (7) or the like being provided to open the bag along the longitudinal seam, which separation or perforation line runs inside the longitudinal seam and extends into the cutout. <IMAGE>
