Abstract (en)

Piece of furniture which can be selectively converted into a bed and into a desktop comprising a load-bearing framework (1) which supports a bed panel (10) and a desktop (20), both of which can be arranged in a bed position, wherein the bed panel is arranged on a substantially horizontal plane which is superimposed on the desktop and spaced from it, and in a desk position, wherein the desktop, by virtue of a translatory motion parallel to itself, becomes arranged in an uppermost position and the bed panel tilts toward the rear part of the load-bearing framework. <IMAGE>
