Abstract (en)
A door plate assembly for providing surface fittings and for installing different operating devices to different lock cases mortised in a door and including two operating axes for said operating devices spaced from each other in the longitudinal direction of the door. The door plate assembly includes a plate body (1), formed so that it comprises an installation opening (2, 3) for each operating axis to be located at the position thereof when installed, and a set of at least three difference plate members (6a-6f) for installation in said openings (2, 3) and at least two of which are provided, according to need, with appropriate guiding means for different alternative operating devices. The plate member (6a-6f) to be installed in each opening (2, 3) in the plate body (1) is selected according to the lock case and any operating device required to be used at the respective operating axis. <IMAGE>
