Abstract (en)

The present invention relates to an element in the form of an endless belt forming, in particular, a textile printing blanket. The element, of the type comprising a roller layer (4) associated with at least one working layer (8) is characterised in that only the roller layer (4) has a high characteristic of longitudinal rigidity, lying between approximately 10<6> and 10<7> newtons per metre. The invention finds an application in the field of textiles. <IMAGE>

Abstract (fr)

La présente invention concerne un élément en forme de bande sans fin formant en particulier blanchet d'impression textile. L'élément, du type comprenant une couche de cylindre (4) associé à au moins une couche de travail (8) est caractérisé en ce que seule la couche de cylindre (4) a une caractéristique de rigidité longitudinale élevée, comprise entre environ 10<6> et 10<7> Newtons par mètre. L'invention trouve application dans le domaine textile. <IMAGE>
