Abstract (en)

[origin: WO9211961A1] The invention relates to a dummy bar for continuous casting installations with a curved guide frame fitted downstream of a mould. The invention provides a dummy bar characterized by a flexible metal strip (1) and components (3) secured to one surface of said strip (1) for releasable connection to spacers (2) extending over the width of the strip (1) on the same surface which have mutually adjacent contact areas (6) at least in the region of the components (3). The free area of the spacers (2) is covered by congruent rubbery plates (5) and the free area of the strip (1) is provided with a rubbery coating (4).
