Abstract (en)
In an improved espagnolette handle, the fixing sockets (11) afforded by the escutcheon flange or casing (1) are through holes allowing the insertion of screws (10) from the front of the handle, hence from the side opposite to that occupied by the back cover plate (8), and can be concealed by applying a removable snap-fitted decor element (12) designed to mask at least part of the front face (1a) of the casing; similarly, the cover plate (8) incorporates positive fasteners (16) enabling its attachment to the rear face (1b). <IMAGE>
