Abstract (en)

A container having substantially parallel walls (2-5) and openable closure (8) means for at least one end (7), said closure means comprising at least three closure flaps (30,31) pivoted to a slidable sleeve (9) surrounding said side walls (3-5) and operating means which close said flaps when said sleeve is moved to a first position and which open said flaps to reveal the interior of the container when the sleeve is moved to a second position.
