Abstract (en)

Ware shaping apparatus (10) comprising a carousel (12) with eight arms (14) each of which mounts at its free end a mould (16) made of a porous plastic material. The moulds (16) are selectively movable between a clay loading device (20), a shaping device in the form of a roller head (22), a mould release dryer (28) including a back stamping device (34), and a mould release stage where the shaped ware can be blown onto a conveyor (30). <IMAGE>
