Abstract (en)

The button comprises a tubular button body made from a transparent material, a nut (52) intended to fix the button body to a support plate (46), a pusher (62) made of a non-transparent material mounted so as to slide axially in the button body and provided with an annular collar (66), and a platen (70) carrying a plurality of light emitters (76), the pusher (62), the collar (66) and the nut (52) having reflective surfaces which allow outward transmission of mutually overlapping light beams (80, 81, 86). <IMAGE>
