Abstract (en)  
[origin: WO9310319A1] The invention concerns a covering (6) designed to be laid on a supporting surface and fixed reversibly to the supporting surface (3) by magnetic attraction. In order to ensure high precision and ease of laying, magnetically attracting or magnetically attracted material (9) in the form of a freely flowing material is integrated, at the covering-manufacturing stage, in the part (8) of the covering designed to lie against the supporting surface.
