Abstract (en)

[origin: EP0567909A1] In a method for applying a chamber-type doctor blade on an ink- releasing cylinder of a rotary sheet printing machine, the object is to avoid bending the working edge of the doctor blades and to increase the service life of the doctor blades. According to the invention, the operating doctor blade is applied against the ink-releasing cylinder on a curved path, a doctor blade suspension being provided in order to rule out bending of the doctor blades. <IMAGE>
