Abstract (en)

[origin: EP0568051A1] In order to improve a building system for a retaining wall comprising vegetation-sustaining slope building elements, provision is made for the slope building elements to be provided at a suitable point with a recess (7) in which a stop element or a connecting clip (9) can be anchored by means of an anchor section engaging in the recess (7). The anchor section or the connecting clip has a stop (17) projecting up above the top encircling margin (5) of the concrete blocks (1). <IMAGE>
