Abstract (en)

A structure is disclosed for mounting, inside a box (16), an electrical apparatus (11) having a device for indicating removal of the apparatus from the box associated therewith. The device comprises two members coupled together and means adapted to produce a signal upon the two members being parted together. One of said members is affixed to the apparatus (11) and the other (17) to an insert (18) joined to the box (16) through expansion anchor means (20) engaging the walls of the box (16).
