Abstract (en)

[origin: EP0568970A1] The sample sheet case (10) has rigid sample sheets (11) arranged in the manner of book pages. When the case is closed, hinges (20) which form a mutual edge connection of the sample sheets together form a flat rear wall (14) of the case shell. The case shell can be simply and reliably closed, in a manner such as to be capable of easy reopening, by means of foldable and magnetically self-adhering wall sections (16, 17) and a positive-fitting locking connection. <IMAGE>
