Abstract (en)

[origin: EP0569027A1] In a cloth-laying machine (1) with a laying carriage (4) which is movable to and fro above a laying surface (2), carries a cloth supply (7), especially a cloth roll, arranged above it preferably approximately in the longitudinal centre, and has a draw-off table (5), arranged below the cloth supply (7) and extending from this in the direction of movement of the cloth web, and a draw-off device (9), the draw-off table (5) is assigned at least one air nozzle (23) which is directed in the approximately horizontal direction of movement of the cloth web and which is arranged at the rear of the point (49) at which the cloth-web portion (19) to be supplied passes onto the draw-off table (5), and the air stream (24) of which is directed between the table surface (18) and the cloth-web portion. <IMAGE>
