Abstract (en)

[origin: EP0569089A1] The invention relates to a storage box folded from a plane sheet, said storage box being provided with a bottom (12,13) and with upright walls. Aligned passages are provided near the upper edges of two opposite walls (33). A part of the plane sheet folded to a U shape joins the upper edge of a wall, said part folded to a U shape comprising two legs (27,31), which abut against the outer sides of the wall joined by the part folded to a U shape and a wall located opposite thereto, respectively. The connecting piece (29) interconnecting the two legs of the part folded to a U shape extends transversely between the two latter walls and is located below said passages. <IMAGE>
