Abstract (en)
[origin: EP0569215A2] Measuring method wherein the measuring method of a sample (11) is chosen from one or more different measuring methods which are performed by the same measuring apparatus (10). The measuring apparatus (10) comprises a multi-function measuring head (50) having one or more different measuring units (51-56), by which measuring of the sample can be performed with one or more different measuring methods without the need for changing parts of the measurement head. Sample conveyors (12, 31) transfer the sample to a preselected measuring unit.
