Abstract (en)
A filter connector comprises a magnetic plate member (11) having holes (12) and openings (13) extending therethrough, electrical contacts (20) are positioned in the holes (12) and capacitors (30) are positioned in the openings (13), electrodes (32, 33) of the capacitors (30) are electrically connected respectively to grounding conductive layer (15) and conductive patterns (17) on surfaces (14, 16) of the plate member (11) so that the contacts (20) are electrically connected to respective capacitors (30). <IMAGE>
