Abstract (en)
High-voltage isolator of the type comprising a female current socket placed at one end of a first vertical insulating column (2), an operating blade (13) articulated to one end of a second vertical insulating column (7) and carrying at a first end a male contact (13B) intended to cooperate with the said female contact, the movement of the blade being ensured by a mechanism connected to an oscillating insulating column (20), characterised in that the articulation of the said blade (13) to the said second column (7) is ensured by means of two levers (12, 14) of unequal length. <IMAGE>
