Abstract (en)

The invention relates to a case, particularly for cosmetic products, of the type comprising a base (1), a lid (3) jointed on an edge of the said base (1) and means (5) for snap-fitting of the lid (3) and of the base (1) on the edge opposite the joint. According to the invention, the joint of the lid (3) on the base (1) consists of two resiliently deformable pins (6), a deformation clearance being provided for each pin (6) between the base (1) and the lid (3), the base (1) or the lid (3) including, in the vicinity of the said joint, at least one stop (11) parallel to the joining plane (12) of the base (1) and of the lid (3) and/or at least one stop (13) orthogonal to the said joining plane (12). Application to packages. <IMAGE>
