Abstract (en)

[origin: EP0571238A2] A knockdown cabinet structure formed of a plastics material comprising rear and side support frames; each side frame being formed at one longitudinal edge with longitudinally spaced apart tubular coupling lugs and longitudinally spaced apart, transversely directed shelf support ledges; the rear frame being formed at two opposite longitudinal edges thereof with two respective sets of coupling bosses, each set comprising longitudinally spaced apart coupling bosses and with two respective sets of shelf engaging bosses, each set comprising longitudinally spaced apart engaging bosses; and a plurality of shelves, each shelf comprising a planar base, a pair of transversely directed, elongated tubular edges, and a pair of side walls; the arrangement being such that upon assembly the sets of coupling bosses respectively fit into the sets of coupling lugs of the respective side frames, the sets of engaging bosses fit into respective end portions of the tubular edges, and said side walls rest on said support ledges. There is also disclosed a two-piece mould for use in the injection moulding of an elongated, substantially planar object such as, for example, a shelf forming part of the cabinet structure. <IMAGE>
