Abstract (en)
Stirring apparatus, which stirring apparatus comprises a standing guide element, a carriage slidable and fixable along the guide element, a stirring apparatus shaft support arranged for pivoting relative to the carriage, wherein the pivot axis of the support crosses the guide element at a distance from the guide path, with which is ensured that the stirring apparatus shaft comes to lie at a greater distance from the guide path, whereby the rotation axis of the stirring apparatus can be set practically vertical, which is favourable for the stirring action in the displaceable vessel. <IMAGE>
