Abstract (en)  
The invention relates to a smoke apron 1 for subdividing and/or channelling smoke and fumes for instance in buildings such as industrial structures, shopping centres and the like, particularly in the event of a fire and with a housing extending along a sub-dividing or channelling line. So that even very long sub-dividing or channelling lines can be made up in a safe structural way, the apron sheet is formed by adjacently disposed apron portions 7 having mutually overlapping longitudinal side edges 10. <IMAGE>
