Abstract (en)

[origin: WO9311994A1] An arrangement for driving a pneumatic boat designed as a built-on unit has a motor unit (M) and a pump unit (P) drivingly linked to the motor unit. The units are arranged on both sides of the front side (66) of a housing that encloses the pump unit at least partially and that is designed as a fastening flange for the upper stern of the pneumatic boat. The motor unit is fastened on supporting elements (78) that are fastened to the side walls (61, 62) of the housing and that extend through the front side of the housing.
