Abstract (en)
[origin: WO9313630A1] There is provided a distribution system (10) and a wiring format which will not only provide for a common enclosure (50) which will help to centralize the entrance of services to a facility, but will also organize the services throughout the facility. In particular, the invention includes an enclosure (50) that will house telephone/audio distribution equipment (32), video distribution equipment (34) and other systems which are desired by the facility owner.
