Abstract (en)

[origin: EP0572809A1] A description is given of a device (1) for drying the outside of hoses (2), in particular fire-extinguishing hoses, which has a pneumatic suction-removal device with suction-removal nozzles arranged on the hose wall above and below the hose (2) moved through the device (1), which device is characterised in that the suction-removal nozzles (6) are arranged one behind the other, at a distance from one another, in the direction of movement of the hose (2), in that the hose (2) is curved in the region of the suction-removal nozzles (6) and in that the suction-removal nozzles (6) are in each case arranged on the outside, on the outwardly curved region of the hose surface (in conjunction with Figure 1).
