Abstract (en)

[origin: EP0572901A1] The drawer guide has guide rails (20) for guiding the drawer. In order that the drawer has a small installation depth, swivel arms (23) are provided at the rear end of the drawer, which swivel arms run with running rollers (25) in the guide rails (20), are swivelled inwards at the rear end of the insertion movement and fold against the rear wall (14) of the drawer. The guide rails (20) are provided with sloping guide webs to fix the swivel arms (23) in the extended state. In the extended state of the drawer, the sloping guide webs of the guide rails (20) force the running rollers (25) outwards, the swivel arms (23) being pressed against stops (30). <IMAGE>
