Abstract (en)

[origin: EP0573066A1] Disclosed is an internal latent image type direct positive silver halide emulsion, which is high in sensitivity and contrasty in low-density portions, comprising a dispersion medium containing at least one metal complex represented by the following general formula (I) and silver halide grains formed therein; and a color diffusion transfer photographic film unit containing the internal latent image type direct positive silver halide emulsion: $[M(CN)_6]^{n-}$ (I) wherein M represents Cr, Mn, Co, Ir, Ru, Rh, Re or Os; and n is 3 or 4.
