Abstract (en)  
[origin: EP0573262A1] A wordprocessing device having a keyboard (3) which can be used to input characters having a plurality of different attributes. When output, an inputted character string can be modified such that all the characters in the string have a common attribute. Furthermore, the original unmodified character string data is stored in a memory for further use. The modified character string can be output by a printer onto a recording medium such as a tape (5). <IMAGE>
