Abstract (en)

The invention relates to an envelope for documents which is intended to be fastened onto an article, and to its method of manufacture. The envelope for documents (1) has the form of a pocket (2), the rear face of which carries a slot for the insertion of the documents and an adhesive mass provided at least around the said slot and protected by a non-adhesive protective element (6). Moreover, it is possible to print on the front face (7) of the pocket and the protective element (6) carries, laterally, "CAROLL" perforations (8). <IMAGE>
