Abstract (en)

[origin: EP0573858A1] Multistorey, automated car park of a substantially underground type for motor vehicles, with a station (39) at ground level for incoming motor vehicles to be parked, which car park comprises a well (11) containing a plurality of platforms (13) able to rotate together about a central axis for the parking of motor vehicles, the platforms (13) being connected together by a three-dimensional structure (29) so as to create a rotary conveyor system, which is contained in a structure (12) able to move vertically within the well (11), the vertically movable structure (12) including at its upper end a roof (16) and at its lower end an equipped platform (15a), which (15a) cooperates with means (14) that perform vertical lifting and with buffer means (20). <IMAGE>
