Abstract (en)

[origin: FR2685859A1] The invention relates to a brush for the application of mascara to the eyelashes, comprised of a central core formed by a twisted metal wire (1) whose twists catch between each other the bristles (2) of the brush, said bristles (2) being arranged substantially regularly between said twists, the invention being characterized in that the bristles (2) have a substantially circular solid straight section whose diameter is comprised between 0.12 and 0.25 mm, the number of bristles (2) per turn being comprised between 5 and 9, said bristles forming substantially a single helical layer wherein each bristle has a substantially radial orientation, the angle between two adjacent bristles of the layer being substantially constant with an approximate tolerance of 20 %.
