Abstract (en)
[origin: EP0575213A1] Dispensing device for a liquid product, comprising a container (2) equipped, at the top, with a dispensing member (4) carrying a push-button (5), a covering (cowling) (6) equipped with an actuating member (7) in the form of a lever articulated on the covering (6) and equipped with a bearing means (18) for acting on the upper outer surface (19) of the push-button (5), the articulation (14) of the actuating member (7) on the covering (6) being located, in terms of height, in line with the mid-height of the travel of the push-button (5); the upper outer surface (19) of the push-button (5) is a convex spherical surface, and the bearing means (18) is a circular ring (18), the annular lower end of which defines a spherical bearing surface complementing that of the upper outer surface (19) of the push-button (5). <IMAGE>
