Abstract (en)

[origin: WO9107439A1] A protein which inhibits milk secretion by lactating cows and which is present in the second (2A) significant peak when a nominally 10-30 KDa fraction of the whey proteins of the milk is resolved on a "Mono Q" anion exchange column using 10 mM imidazole buffer, pH 7.0 and a sodium chloride elution gradient.

Abstract (fr)

Protéines inhibant la sécrétion de lait par des vaches allaitant, et présente dans la seconde crête significative (2A) lorsqu'une fraction nominale de 10 à 30 kDa des protéines de lactosérum dulait est dissoute dans une colonne d'échange anionique "mono Q", utilisant un tampon d'imidazole de 10 mM, un pH de 7,0 et un gradient d'élution de chlorure de sodium.
