Abstract (en)

[origin: WO9215978A1] The invention concerns an arrangement for locating objects and for exchanging data with these objects. The aim is to locate and exchange data with every single object in a plurality of objects moving in any way in a predetermined zone. To this end, the zone (2) is illuminated from a fixed station (4) by a microwave antenna arrangement with a plurality of stationary radiation beams covering the entire zone or with a swivelling radiation beam. The arrangement of the invention can be used to collect tollgate fees of vehicles.
