Abstract (en)

[origin: WO9216420A1] A plastic container package (1) for bulk materials, such as liquids or pourable fine granules or the like, is surrounded on the outside by a close-fitting cardboard or paper strip (3) and has, at least in regions, an upper stopping edge (7) for the cardboard strip. To fit the container with a printable and easily removable streamer, the plastics container (2) has catch ramps (9) in the form of stopping shoulders (10) in the transition region between the bottom face (8) and the side faces (2a), and in the position of use, the cardboard sheath (3) is designed as a closed streamer (3) which is fixed between the stopping shoulders (10) by pushing it over the catch ramps (9).
