Abstract (en)
[origin: WO9310486A1] A wristwatch has a housing and stops shaped on the housing. The watch has a strap with connecting pieces for releasably linking the strap to the housing of the watch. The connecting piece has two pins movably arranged at the ends of a sleeve that project beyond the respective ends of the sleeve. An opening for receiving an end of the connecting pin is provided in the watch stop. The wristwatch has releasing means with one or two actuating members (9). The actuating members (9) release the strap against the force of a spring on the pins (6). The actuating member (9) has a head (10) with a bolt (11) and the stop (2) has a receptacle (12) with a throughbore (13) that ends in the opening (7). The bolt (11) extends through the throughbore (13).
