Abstract (en)

Hood for the extraction of fumes above a cooking area (2), comprising a telescopic extendable assembly (10) which ends towards the bottom in a removable inlet head (11) which forms an annular filtering inlet mouth (21) in the form of a labyrinth filter (30) arranged in a circular manner. The hood is also formed from an extractor-hood panel (9) which is integral with the bottom end of the fixed tube (15), with a central recessed conical zone (14), into which the filtering inlet mouth (21) comes to fit in the extreme top position. The invention is of interest to manufacturers of domestic electric appliances for kitchens. <IMAGE>
