Abstract (en)

[origin: EP0575784A1] What is described is an espagnolette fastening for wings, especially for turn and turn-and-tilt wings, of windows, doors or the like, having longitudinally displaceable espagnolettes 7 and locking studs (8) or the like, which are attached to these and which, during the axial displacement of the espagnolette 7 for locking the window or door, engage behind the locking nose 9 of locking plates 11 arranged on the fixed frame 10 or on an adjacent wing 16. At the same time, sleeves 14 can be pressed onto the conventional, for example cylindrical, locking studs 8 or the like, the inner contour of the said sleeves being matched to the outer contour of the locking studs 8 or the like which, however, have a bevelled, for example conical, outer contour. <IMAGE>
