Abstract (en)

Device for the continuous winding of a material web, in particular a carrier tape, from which labels have been removed in a labelling machine, characterised by two winding mandrels to be driven, which are arranged parallel to and a distance from one another and in the direction of which the material web is to be pressed selectively by means of a pressure device, and by a severing device, arranged between the winding mandrels, for severing a portion of the material web running between the winding mandrels. <IMAGE>

Abstract (de)

Vorrichtung gekennzeichnet durch zwei in Abstand voneinander parallel zueinander angeordnete, anzutreibende Wickeldorne (18,22), in Richtung (D) auf die die Materialbahn (2) wahlweise mittels einer Andruckvorrichtung (30,32,34,46,48,50) zu drücken ist, und durch eine zwischen den Wickeldornen (18,22) angeordnete Trennvorrichtung (38) zum Durchtrennen eines zwischen den Wickeldornen (18,22) verlaufenden Abschnitts (E) der Materialbahn (2). <IMAGE>
