Abstract (en)

The invention relates to a doctor-blade support intended especially for a screen-printing machine, characterised by a first pair of catching reliefs (13a, 13b) arranged opposite one another; a second pair of catching reliefs (14a, 14b) arranged opposite one another; the reliefs of the first and second pairs (13a, 13b, 14a, 14b) being respectively complementary with one another, so as to be capable of cooperating with one another removably; one of the two pairs of reliefs (13a, 13b, 14a, 14b) having a double plurality of similar successive reliefs, the same clamping means (10, 15) making it possible to lock the vice (5) angularly relative to the base (6) about the main axis (12) between two end positions. <IMAGE>
