Abstract (en)

[origin: WO9313686A1] A strap consisting of a series of central (3), intermediate (2) and side (1) links. Each end of every central link (3) comprises two connecting elements (13) passing through a separate intermediate link (2), and the ends of the connecting elements (13) which are located on the same side as the central link (3) are axially held in an outer link (1) by means of a fastener (19) which enables said connecting elements (13) to rotate in relation to the outer links (1).
