Abstract (en)

[origin: EP0576729A1] Intake manifold for an internal combustion engine with one cylinder head, comprising at least one intake pipe (1) with an intake flange (2) for gas-tight fixing on the cylinder head, a bypass line (3) being provided for feeding a secondary gas into an intake port of an internal combustion engine and it being possible to feed the gas into the bypass line (3) by means of a connection (4). The bypass line (3) is formed by a groove (5) of the intake flange (2), open in the direction of the cylinder head, and the connection (4) is connected to the one end and the intake port to the other end of the groove (5). <IMAGE>
